The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ash'141 and Callingham et.al.'411. The latter reference teaches ferrous gluconate administered interperitonealy. Ash teaches internal administration of the additional ions of claim 16. Nothing unobvious can be seen in combining and administering said ingredients for their expected additive effects. The term "dialysate" does not distinguish said claims over other aqueous compositions administered in this manner.

Claims 1-23 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 1-19 and 21-23 are too broad in not reciting proportions of ingredients and /or amounts administered. Claims 1-8,10,11 and 13-23 are broader than warranted by the disclosure of a single iron compound.

Claims 1,5,18 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1 and 5; and 18 and 20 are deemed to be duplicate claims.
